Relevance scale **121 A proxy-based personal web archiving service**

Herman Chung-Hwa Rao, Yih-Farn Chen, Ming-Feng Chen

January 2001 **ACM SIGOPS Operating Systems Review**, Volume 35 Issue 1Full text available:  [pdf\(2.12 MB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

The Web contains so much information that it is almost beyond measure. How do users manage the useful information that they have seen while screening out the rest that doesn't interest them? Bookmarks help, but bookmarking a page doesn't guarantee that it will be available forever. Search engines are becoming more powerful, but they can't be customized based on the access history of individual users. This paper suggests that a better alternative to managing web information is through a middlewar ...

122 A framework for sharing personal annotations on web resources using XMLTakeshi Sannomiya, Toshiyuki Amagasa, Masatoshi Yoshikawa, Shunsuke Uemura
January 2001 **Australian Computer Science Communications**, Volume 23 Issue 6Full text available:  [pdf\(835.34 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)
 [Publisher Site](#)

In this paper, we propose WISPA (Web Indicator by Sharing Personal Annotations) Framework, which aims at mining useful information from communities on the World Wide Web with sharing personal annotations. In WISPA, annotations assigned to web pages on WWW are highly respected, because personal annotations contain each users' opinions or impressions to web pages, and those annotations can be used as essential materials for judging whether an information is important or not. Concretely, the proces ...

Keywords: WWW, XLink, XML, XML schema, merged annotation, personal annotation**123 Toward a model of self-administering data**

ByungHoon Kang, Robert Wilensky0

January 2001 **Proceedings of the first ACM/IEEE-CS joint conference on Digital libraries**Full text available:  [pdf\(308.08 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We describe a model of self-administering data. In this model, a declarative description of how a data object should behave is attached to the object, either by a user or by a data input device. A widespread infrastructure of self-administering data handlers is presumed to exist; these handlers are responsible for carrying out the specifications attached to the data. Typically, the specifications express how and to whom the data should be transferred, how it should be incorporated when it i ...

124 Managing change on the web

Luis Francisco-Revilla, Frank Shipman, Richard Furuta, Unmil Karadkar, Avital Arora
 January 2001 **Proceedings of the first ACM/IEEE-CS joint conference on Digital libraries**

Full text available: [!\[\]\(7f8d804c6d199749d3dd53592a5ca12b_img.jpg\) pdf\(274.89 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Increasingly, digital libraries are being defined that collect pointers to World-Wide Web based resources rather than hold the resources themselves. Maintaining these collections is challenging due to distributed document ownership and high fluidity. Typically a collections maintainer has to assess the relevance of changes with little system aid. In this paper, we describe the Waldens Paths Path Manager, which assists a maintainer in discovering when relevant changes occur to linked resour ...

Keywords: Walden's path, path maintenance

125 Information quality of commercial web site home pages: an explorative analysis

Xiaoni Zhang, Kellie B. Keeling, Robert J. Pavur
 December 2000 **Proceedings of the twenty first international conference on Information systems**

126 Web-based and Java-based simulation: A review of web based simulation: whither we wander?

Jasna Kuljis, Ray J. Paul
 December 2000 **Proceedings of the 32nd conference on Winter simulation**

Full text available: [!\[\]\(d538389f939343cdedbb759655cf0521_img.jpg\) pdf\(226.42 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

This paper considers a variety of new technologies for discrete-event simulation software development. Environments and languages for web based simulation are reviewed. Web based applications are discussed. After proposing a summary of the review, ways of working that will have an unpredictable effect on the future of simulation modeling are proposed.

127 WebSplitter: a unified XML framework for multi-device collaborative Web browsing

Richard Han, Veronique Perret, Mahmoud Naghshineh
 December 2000 **Proceedings of the 2000 ACM conference on Computer supported cooperative work**

Full text available: [!\[\]\(159d358f62b1ac8b870dab1e418e0037_img.jpg\) pdf\(200.60 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

WebSplitter symbolizes the union of pervasive multi-device computing and collaborative multi-user computing. WebSplitter provides a unified XML framework that enables multi-device and multi-user Web browsing. WebSplitter splits a requested Web page and delivers the appropriate partial view of each page to each user, or more accurately to each user's set of devices. Multiple users can participate in the same browsing session, as in traditional conferencing groupware. Depending on the acc ...

128 The state of the art in distributed query processing

Donald Kossmann

December 2000 **ACM Computing Surveys (CSUR)**, Volume 32 Issue 4Full text available:  [pdf\(455.39 KB\)](#)Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Distributed data processing is becoming a reality. Businesses want to do it for many reasons, and they often must do it in order to stay competitive. While much of the infrastructure for distributed data processing is already there (e.g., modern network technology), a number of issues make distributed data processing still a complex undertaking: (1) distributed systems can become very large, involving thousands of heterogeneous sites including PCs and mainframe server machines; (2) the stat ...

Full text available:  pdf(6.94 MB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper describes a methodology for the development of WWW applications and a tool environment specifically tailored for the methodology. The methodology and the development environment are based upon models and techniques already used in the hypermedia, information systems, and software engineering fields, adapted and blended in an original mix. The foundation of the proposal is the conceptual design of WWW applications, using HDM-lite, a notation for the specification of structure, nav ...

137 [Consistency and locking for distributing updates to web servers using a file system](#)

Randal C. Burns, Darrell D. E. Long, Robert M. Rees

September 2000 **ACM SIGMETRICS Performance Evaluation Review**, Volume 28 Issue 2

Full text available:  pdf(664.91 KB) Additional Information: [full citation](#), [abstract](#), [index terms](#)

Distributed file systems are often used to replicate a Web site's content among its many servers. However, for content that needs to be dynamically updated and distributed to many servers, file system locking protocols exhibit high latency and heavy network usage. Poor performance arises because the Web-serving workload differs from the assumed workload. To address the shortcomings of file systems, we introduce the *publish consistency* model well suited to the Web-serving workload and impl ...

138 [Crawler-Friendly Web Servers](#)

Onn Brandman, Junghoo Cho, Hector Garcia-Molina, Narayanan Shivakumar

September 2000 **ACM SIGMETRICS Performance Evaluation Review**, Volume 28 Issue 2

Full text available: [pdf\(513.04 KB\)](#) Additional Information: [full citation](#), [abstract](#), [index terms](#)

In this paper we study how to make web servers (e.g., Apache) more crawler friendly. Current web servers offer the same interface to crawlers and regular web surfers, even though crawlers and surfers have very different performance requirements. We evaluate simple and easy-to-incorporate modifications to web servers so that there are significant bandwidth savings. Specifically, we propose that web servers export meta-data archives describing their content.

140 Incorporating quality metrics in centralized/distributed information retrieval on the World Wide Web

Xiaolan Zhu, Susan Gauch

July 2000 **Proceedings of the 23rd annual international ACM SIGIR conference on Research and development in information retrieval**

Full text available: [pdf\(834.55 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

Most information retrieval systems on the Internet rely primarily on similarity ranking algorithms based solely on term frequency statistics. Information quality is usually ignored. This leads to the problem that documents are retrieved without regard to their quality. We present an approach that combines similarity-based similarity ranking with quality ranking in centralized and distributed search environments. Six quality metrics, including the *currency*, *availability*, *infor* ...

141 OCELOT: a system for summarizing Web pages

Adam L. Berger, Vibhu O. Mittal

 July 2000 **Proceedings of the 23rd annual international ACM SIGIR conference on Research and development in information retrieval**

 Full text available: [pdf\(1.19 MB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

We introduce OCELOT, a prototype system for automatically generating the "gist" of a web page by summarizing it. Although most text summarization research to date has focused on the task of news articles, web pages are quite different in both structure and content. Instead of coherent text with a well-defined discourse structure, they are more often likely to be a chaotic jumble of phrases, links, graphics and formatting commands. Such text provides little foothold for extractive ...

142 Collaborative Web caching based on proxy affinities

Jiong Yang, Wei Wang, Richard Muntz

 June 2000 **ACM SIGMETRICS Performance Evaluation Review , Proceedings of the 2000 ACM SIGMETRICS international conference on Measurement and modeling of computer systems**, Volume 28 Issue 1

 Full text available: [pdf\(1.10 MB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

With the exponential growth of hosts and traffic workloads on the Internet, collaborative web caching has been recognized as an efficient solution to alleviate web page server bottlenecks and reduce traffic. However, cache discovery, i.e., locating where a page is cached, is a challenging problem, especially in the fast growing World Wide Web environment, where the number of participating proxies can be very large. In this paper, we propose a new scheme which employs proxy affinities to mai ...

143 Information retrieval on the web

Mei Kobayashi, Koichi Takeda

 June 2000 **ACM Computing Surveys (CSUR)**, Volume 32 Issue 2

 Full text available: [pdf\(213.89 KB\)](#)

 Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this paper we review studies of the growth of the Internet and technologies that are useful for information search and retrieval on the Web. We present data on the Internet from several different sources, e.g., current as well as projected number of users, hosts, and Web sites. Although numerical figures vary, overall trends cited by the sources are consistent and point to exponential growth in the past and in the coming decade. Hence it is not surprising that about 85% of Internet user ...

144 Managing software artifacts on the Web with Labyrinth

Fabiano Cattaneo, Elisabetta Di Nitto, Alfonso Fuggetta, Luigi Lavazza, Giuseppe Valetto
 June 2000 **Proceedings of the 22nd international conference on Software engineering**

Full text available: [pdf\(187.21 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Software developers are increasingly exploiting the Web as a document management system. However, the Web has some limitations, since it is not aware of the structure and semantics associated to pieces of information (e.g., the fact that a document is a requirement specification) and of the semantics of relationships between pieces of information (e.g., the fact that a requirement specification document may be associated to some design specification document). In the Labyri ...

145 WebView materialization

Alexandros Labrinidis, Nick Roussopoulos
 May 2000 **ACM SIGMOD Record , Proceedings of the 2000 ACM SIGMOD international conference on Management of data**, Volume 29 Issue 2

Full text available: [pdf\(195.16 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

A *WebView* is a web page automatically created from base data typically stored in a DBMS. Given the multi-tiered architecture behind database-backed web servers, we have the option of materializing a *WebView* inside the DBMS, at the web server, or not at all, always computing it on the fly (virtual). Since *WebViews* must be up to date, materialized *WebViews* are immediately refreshed with every update on the base data. In this paper we compare the three materialization policies (materializ ...

146 Synchronizing a database to improve freshness

Junghoo Cho, Hector Garcia-Molina
 May 2000 **ACM SIGMOD Record , Proceedings of the 2000 ACM SIGMOD international conference on Management of data**, Volume 29 Issue 2

Full text available: [pdf\(362.34 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In this paper we study how to refresh a local copy of an autonomous data source to maintain the copy up-to-date. As the size of the data grows, it becomes more difficult to maintain the copy \ fresh, "making it crucial to synchronize the copy effectively. We define two freshness metrics, change models of the underlying data, and synchronization policies. We analytically study how effective the various policies are. We also experimentally verify our analysis, based on data collected from ...

147 Implementing a caching service a distributed COBRA objects

Gregory V. Chockler, Danny Dolev, Roy Friedman, Roman Vitenberg
 April 2000 **IFIP/ACM International Conference on Distributed systems platforms**

Full text available: [pdf\(324.53 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

This paper discusses the implementation of CASCADE, a distributed caching service for CORBA objects. Our caching service is fully CORBA compliant, and supports caching of active objects, which include both data and code. It is specifically designed to operate over the Internet by employing a dynamically built cache hierarchy. The service architecture is highly configurable with regard to a broad spectrum of application parameters. The main benefits of CASCADE are enhanced availability and ser ...

148 Declarative specification of Web sites with S

Mary Fernández, Daniela Florescu, Alon Levy, Dan Suciu

March 2000 **The VLDB Journal — The International Journal on Very Large Data Bases,**

Volume 9 Issue 1

Full text available:  pdf(188.65 KB) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

S is a system for implementing *data-intensive* Web sites, which typically integrate information from multiple data sources and have complex structure. S's key idea is separating the management of a Web site's data, the specification of its content and structure, and the visual representation of its pages. S provides a declarative *query language* for specifying a site's content and structure, and a simple *template language* for specifying a site's HTML representation. This paper ...

Keywords: Declarative query languages, Web-site management

John Aycock, Michael Levy

November 1999 **Crossroads**, Volume 6 Issue 2Full text available:  html(30.18 KB) Additional Information: [full citation](#), [index terms](#)151 An adaptive real-time Web search engine

Augustine Chidi Ikeji, Farshad Fotouhi

November 1999 **Proceedings of the second international workshop on Web information and data management**Full text available:  pdf(813.68 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The Internet provides a wealth of information scattered all over the world. The fact that the information may be located anywhere makes it both convenient for placing information on the Web and difficult for others to find. Conventional search engines can only locate information that is in their search index and users do not have much choice in limiting or expanding the search parameters. Some web pages like those for news services change frequently and will not work well with index based s ...

152 Task-oriented world wide web retrieval by document type classification

Katsushi Matsuda, Toshikazu Fukushima

November 1999 **Proceedings of the eighth international conference on Information and knowledge management**Full text available:  pdf(670.09 KB) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

This paper proposes a novel approach to accurately searching Web pages for relevant information in problem solving by specifying a Web document category instead of the user's task. Accessing information from World Wide Web pages as an approach to problem solving has become commonplace. However, such a search is difficult with current search services, since these services only provide keyword-based search methods that are equivalent to narrowing down the target references according to domain ...

Birgit Pröll, Heinrich Starck, Werner Retschitzegger, Harald Sighart

November 1999 **Proceedings of the eighth international conference on Information and knowledge management**

Full text available:  pdf(974.45 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

In large data- and access-intensive web sites, efficient and reliable access is hard to achieve. This situation gets even worse for web sites providing precise structured query facilities and requiring topicality of the presented information even in face of a highly dynamic content. The achievement of these partly conflicting goals is strongly influenced by the approach chosen for page generation, ranging from composing a web page upon a user's request to its generation in advance. The offi ...

Jia Wang

October 1999 **ACM SIGCOMM Computer Communication Review**, Volume 29 Issue 5

Full text available:  pdf(1.15 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

The World Wide Web can be considered as a large distributed information system that provides access to shared data objects. As one of the most popular applications currently running on the Internet, the World Wide Web is of an exponential growth in size, which results in network congestion and server overloading. Web caching has been recognized as one of the effective schemes to alleviate the service bottleneck and reduce the network traffic, thereby minimize the user access latency. In this pap ...

This paper describes an application model and software technology that makes it possible to run World Wide Web applications in wide area wireless networks. Web technology in conjunction with today's mobile devices (e.g., laptops, notebooks, personal digital assistants) and the emerging wireless technologies (e.g., digital cellular, packet radio, CDPD) offer the potential for unprecedented access to data and applications by mobile workers. Yet, the limited bandwidth, high latency, high cost, ...

164 Discovering Internet marketing intelligence through online analytical web usage mining

Alex G. Büchner, Maurice D. Mulvenna

 December 1998 **ACM SIGMOD Record**, Volume 27 Issue 4

 Full text available: [pdf\(772.06 KB\)](#) Additional Information: [full citation](#), [abstract](#), [citations](#), [index terms](#)

This article describes a novel way of combining data mining techniques on Internet data in order to discover actionable marketing intelligence in electronic commerce scenarios. The data that is considered not only covers various types of server and web meta information, but also marketing data and knowledge. Furthermore, heterogeneity resolution thereof and Internet- and electronic commerce-specific pre-processing activities are embedded. A generic web log data hypercube is formally defined ...

This paper describes a lightweight yet powerful approach for writing distributed applications using shared variables. Our approach, called SHAREHOLDER, is inspired by the flexible and intuitive model of information access common to the World Wide Web. The distributed applications targeted by our approach all share a weak consistency model and loose transaction semantics, similar to a user's model of accessing email, bulletin boards, chat rooms, etc. on the Internet. The SHA ...

With the maturity of network technology, the deterministic factor of a 'successful' web site does not as much depend on its connectivity to the Internet, rather the content of web pages plays a more important role. The inclusion of dynamic data, for example, has become an increasingly desirable feature of a web page. Web servers that support dynamic web pages are capable of retrieving data at the time of user requests. Rather than being statically included in the web page, these dynamically retr ...
